

# Low Uric Acid Diet - How a Low Uric Acid Diet Can Relieve Your Gout

**L**ow **uric acid diet** is essential if you're suffering **gout** right now and also for preventing your gout returning in the future. But when folks refer to it as a low 'uric acid' eating habits it really means a low 'purine' diet, which you'll find out about the following...

**Purines** are chemical compounds found in the body and lots of foods that through a chemical process provides us with energy and protein. So purines are very important. Unfortunately, one of the byproducts of the process is **uric acid**, which can form crystals in your joints and surrounding tissues, causing the agony of gout.

So when we talk about a low 'uric acid' diet, we are really talking about a low purine diet. In practice, this means identifying and eliminating foods that are high in purines, and, replacing them with foods that we know are decreased purines, especially when you are having a gout attack.

## So a Good Diet to Lower **Uric Acid** Would Consist of:-

Cherries (highly recommended), strawberries, blueberries, grapes, zero fat dairy produce, salmon, tuna, foods an excellent source of vitamin C, cereals, rice, pasta, and lots of vegetables (except mushrooms, cauliflower, and asparagus!). Also, drink 10 in order to 12 eight-ounce glasses of water every day. Mineral water is critical so that you can help flush uric acid out of your body.

## Foods You Should Eliminate are:-

Red meat, game, offal-type foods, gravy, poultry, shellfish, mackerel, herrings, sardines, anchovies, fish roe, beans, peas, peas, asparagus, mushrooms, cauliflower, candida. And of course you must avoid all alcohol, but specifically beer.

“ ***Best Natural Gout Remedies - Treating Gout Attack** Gout is a disease common to middle-aged men and women who have passed their menopausal stage. This goes with unbearable pain, inflammation of the joints and redness of the affected area. How does this gout form? If the body, specifically the blood...*
